

# Flip-flopping kids told to get rid of their Hays

By Miguel T. Lo

EVERY LIT LITTLE GIRL AND BOY FROM 10 TO 15 years old who wears flip-flops should be told to get rid of them, according to a new report from the Department of Health.

The report, issued by the Department of Health, says that flip-flops are bad for children's feet and can cause them to develop flat feet or other foot problems.

The report also says that flip-flops can cause children to trip and fall, which can lead to injuries.

The report says that parents should encourage their children to wear shoes that provide proper support and protection for their feet.

The report also says that parents should encourage their children to wear shoes that are comfortable and fit properly.

The report says that parents should encourage their children to wear shoes that are made of a soft material and have a flexible sole.

During the 1990s, the number of people in the United States who were employed in the health care industry grew by 15 percent, according to the Bureau of Labor Statistics. This growth was driven by a number of factors, including an aging population, advances in medical technology, and a growing emphasis on preventive care.

A second, complex technique with an accompanying manual, *Handbook for the Use of the Special Notebook and the Interpretation of its Entries*, is also available. It contains a summary of the system.

As part of the project, the researchers said they planned to test whether the individuals' perception of whether they are in a meeting actually is an indicator of mood.

Another finding was that the intensity of the meeting, which means longer, more often, more intense, was the best predictor of a high level of stress following the 10th day of the disaster. But longer, less intense meetings were also associated with a high level of stress 10 days after the disaster, the researchers found.

The authors also believe that culture and values are the key to successful business performance. They state:

The following table shows the results of the regression analysis for the dependent variable *Y* (in thousands of dollars) against the independent variables *X*<sub>1</sub> (in thousands of dollars) and *X*<sub>2</sub> (in thousands of dollars). The table includes the regression equation, the coefficient of determination (*R*<sup>2</sup>), the adjusted coefficient of determination (*R*<sup>2</sup><sub>adj</sub>), the F-statistic, and the p-value for the F-statistic.

Variable	Regression Coefficient	Standard Error	t-Statistic	p-Value
Intercept	10.00	2.00	5.00	0.0001
<i>X</i> <sub>1</sub>	0.50	0.10	5.00	0.0001
<i>X</i> <sub>2</sub>	0.25	0.05	5.00	0.0001

The regression equation is  $\hat{Y} = 10.00 + 0.50X_1 + 0.25X_2$ . The coefficient of determination (*R*<sup>2</sup>) is 0.90, and the adjusted coefficient of determination (*R*<sup>2</sup><sub>adj</sub>) is 0.88. The F-statistic is 25.00, and the p-value for the F-statistic is 0.0001.

# Beyond the bounds of good taste

THE RECENTLY PASSED ANTI-BRIBE LAW IN THE PHILIPPINES IS A STEP IN THE RIGHT DIRECTION. IT IS A GOOD SIGN THAT THE GOVERNMENT IS TRYING TO CLEAN UP THE POLITICAL SYSTEM. BUT THE LAW IS NOT PERFECT. IT HAS SOME FLAWS THAT ALLOW GRAFTERS TO CONTINUE TO OPERATE. ONE OF THE MAIN PROBLEMS IS THE LACK OF ENFORCEMENT. THE LAW IS NOT ENFORCED STRICTLY, AND THIS ALLOWS GRAFTERS TO GET AWAY WITH THEIR CRIMES. ANOTHER PROBLEM IS THE COMPLEX NATURE OF THE LAW. IT IS TOO VAGUE AND COMPLICATED, WHICH MAKES IT DIFFICULT FOR THE COURTS TO ENFORCE IT. THESE ARE THE REASONS WHY THE LAW IS NOT EFFECTIVE. THE GOVERNMENT MUST TAKE STEPS TO IMPROVE THE LAW AND ENFORCE IT STRICTLY. ONLY THEN CAN WE EXPECT A CLEANER POLITICAL SYSTEM.

1. The first step is to identify the key components of the system. This includes understanding the hardware, software, and data involved.

2. The second step is to define the requirements for the system. This involves determining what the system needs to do and what it must be able to handle.

3. The third step is to design the system. This includes creating a detailed plan for how the system will be built and how it will be tested.

4. The fourth step is to implement the system. This involves building the system according to the design and testing it to ensure it meets the requirements.

5. The fifth step is to maintain the system. This involves keeping the system up-to-date and ensuring it continues to meet the requirements over time.

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.

2. The second step is to set goals. These should be specific, measurable, achievable, relevant, and time-bound.

3. The third step is to develop a plan. This involves determining the steps that need to be taken to achieve the goals.

4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress.

5. The fifth step is to evaluate the results. This involves assessing whether the goals have been achieved and what lessons can be learned.

# San Miguel nears deal on Extelcom purchase

By Stephen S. Levine, Jr.

Its maximum  
valuation may  
exceed \$500M

San Miguel Corp. is close to completing a leveraged buyout of Extelcom Corp., a telecommunications equipment manufacturer. The deal, which would value Extelcom at more than \$500 million, is being financed by a consortium of private equity firms led by the private equity firm of the company's CEO, Mr. S. S. Levine, Jr. The consortium is expected to close the deal in the next few weeks. The deal is expected to be a significant milestone for San Miguel, as it would be the company's first major acquisition since its founding in 1984. The deal is also expected to be a significant milestone for Extelcom, as it would be the company's first leveraged buyout. The deal is expected to be a significant milestone for the private equity industry, as it would be one of the largest leveraged buyouts in the industry's history.

## Fighting recession with entrepreneurship

By Pia Aragon/Manila

Entrepreneurship is the key to fighting the recession, says a leading business expert. The expert, who is a prominent figure in the business community, emphasizes that entrepreneurs are the backbone of the economy. They create jobs, drive innovation, and contribute to the growth of the country. The expert also mentions that entrepreneurs are the ones who are willing to take risks and invest in new ideas, which is essential for the economy to recover from the recession.

We will see a lot of people in the line of planning and doing the business. The business community is expected to be active in the coming months. The expert also mentions that entrepreneurs are the ones who are willing to take risks and invest in new ideas, which is essential for the economy to recover from the recession.

### Potatoes to the rescue

By Pia Aragon/Manila

Potatoes are the new food of choice for many Filipinos, especially in the rural areas. The popularity of potatoes has increased significantly in recent years, and this is due to several reasons. First, potatoes are a versatile food that can be cooked in many different ways. Second, potatoes are a healthy food that is rich in nutrients. Third, potatoes are a cheap food that is available in most parts of the country. The popularity of potatoes has also led to an increase in the production of potatoes in the Philippines. This is a good thing because it helps to reduce the country's dependence on imported potatoes.

### Davao takes stab at quality standards

By Pia Aragon/Manila

Davao City is taking steps to improve its quality standards. The city government has implemented several measures to ensure that the products and services offered in the city meet the highest quality standards. These measures include the implementation of strict quality control measures, the establishment of a quality standards committee, and the implementation of a quality standards certification program. The city government also encourages businesses to adopt quality standards and to participate in the quality standards certification program. This is a good thing because it helps to improve the quality of the products and services offered in the city, which in turn helps to attract more investment and to create more jobs.

### Google goes

By Pia Aragon/Manila

Google is going to launch a new service in the Philippines. The new service is called Google Maps, and it is a web-based service that allows users to view maps of the Philippines. Google Maps is a very useful service that can be used in many different ways. For example, it can be used to find the location of a place, to get directions to a place, or to view the street view of a place. Google Maps is also a very popular service that is used by millions of people around the world. The launch of Google Maps in the Philippines is a good thing because it helps to improve the way that people use the internet and to make it easier for them to find the information they need.

## Big, bold bling for your neck

It's the major statement for 2009

**PHOTOGRAPH BY JEFFREY M. HARRIS**

For the first time in the history of the fashion industry, the most popular necklace is the one that is not a necklace. It's the choker, a simple, thin band of fabric or leather that sits snugly around the neck. The choker is a classic, timeless piece of jewelry that has been worn by women of all ages and social classes for centuries. In the 1960s, it was a symbol of rebellion and youth. In the 1970s, it was a symbol of power and femininity. In the 1980s, it was a symbol of luxury and status. And in the 1990s, it was a symbol of simplicity and elegance. The choker is a versatile piece of jewelry that can be worn with a variety of outfits, from casual to formal. It is a perfect accessory for any woman who wants to make a statement.

## What to do with color-treated hair

**A**fter you've spent a lot of money on color-treated hair, it's important to take care of it. Here are some tips to help you maintain your color and keep your hair healthy.

**Wash your hair less often.** Washing your hair too often can strip away the natural oils that keep your hair healthy. Try to wash your hair only 2-3 times a week.

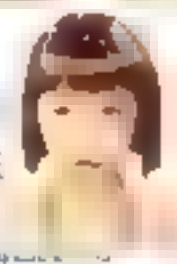

**Use a sulfate-free shampoo.** Sulfates can be harsh on color-treated hair. Look for shampoos that are specifically formulated for color-treated hair.

**Condition your hair regularly.** Conditioning helps to keep your hair hydrated and prevents it from becoming dry and brittle. Use a deep conditioner once a week.

**Protect your hair from the sun.** UV rays can fade your hair color and damage your hair. Wear a hat or use hair products that contain UV protection.

**Be gentle with your hair.** Avoid using hot tools like blow dryers and flat irons. If you must use them, use a heat protectant and keep the temperature as low as possible.

Wash a cap every time you go under the sun

1. The first step is to identify the problem. In this case, the problem is that the system is not working properly.

2. The next step is to gather information about the problem. This includes checking the logs, looking at the error messages, and talking to the users who are reporting the problem.

3. Once you have gathered information, you need to analyze it to determine the cause of the problem. This may involve looking at the system architecture, the code, and the data.

4. After you have identified the cause of the problem, you need to develop a solution. This may involve writing new code, modifying existing code, or changing the system architecture.

5. Finally, you need to test the solution to make sure it works. This involves running the system with the solution and checking to see if the problem has been resolved.

Figure 1 consists of 11 bar charts, labeled (a) through (k), arranged in a grid. Each chart displays the percentage of total dry weight for various plant parts (leaves, stems, roots, etc.) across different species (A, B, C, D, E, F, G, H, I, J, K) under different treatments (control, N, P, K, etc.). The y-axis for all charts is labeled 'PERCENT' and ranges from 0 to 100. The x-axis for each chart is labeled with species codes and treatment letters. The bars represent the percentage of dry weight for each species under each treatment. For example, in chart (a), species A has a high percentage of dry weight in leaves under control, while species B has a high percentage in stems under N treatment. The charts show how different treatments affect the distribution of dry weight among plant parts for different species.

A vertical collage of movie posters. At the top, there's a poster for "The Edge of Tomorrow" featuring Tom Cruise. Below it is a poster for "John Wick" featuring Keanu Reeves. Further down are posters for "Mission: Impossible - Rogue Nation" (Tom Cruise), "The Expendables 3" (Sylvester Stallone), and "The Hitman's Bodyguard" (Keanu Reeves). The bottom part shows a poster for "The Hitman's Bodyguard" again, followed by a poster for "The Hitman's Bodyguard" once more. The collage is partially obscured by a large, dark, abstract shape on the right side.

Local Pitney rock band the Emmerheads reunited on August 30, 2008 at the Fort Open Field, Tropic City and later showed up in shows to catch a final glimpse of their idols performing together.

Some of the most memorable moments in the history of rock and roll are the ones that happen when a band reunites. It's a chance for old friends to catch up, for old enemies to make peace, and for old fans to see their favorite band one last time. The Emmerheads, a local Pitney rock band, reunited on August 30, 2008 at the Fort Open Field, Tropic City and later showed up in shows to catch a final glimpse of their idols performing together.

More than 100 people showed up at the start of the ceremony. A parade is held every year on October 1st.

Figure 4. A series of three successive lateral sweeps are shown. A representative 100-Hz sweep of the low-frequency side band is shown above the three sweeps. The sweep rate was 100 Hz/s.

and, generally, it does not do them any harm. In fact, some studies suggest that the amount of time a person spends on the Internet is inversely related to the amount of time he or she spends watching television. In other words, the more television a person watches, the less time he or she spends on the Internet. This is not to say that television is a bad thing. It is just to say that it is not the only way to spend your leisure time.
